BY THE GAACE OF GOD: KAMEHAMEHA IV.,

KING OF THE HAWAHAN ISLANDS: We make known that, in pursuance of the provisions of our Constitution, we hereby convoke and order the Legislative Chambers of our Kingdom to assemble at our Capital of Honolulu, at half-past ten A. M. of the First Day of May A. D. Eighteen hundred and sixty-two.

Given under our Royal Sign Manual at our Palace, in the City of Honolulu, this twelfth day of March A. D. Eighteen hundred and sixty-two, and in the Eighth year of oun Reign. KAMEHAMEHA.

By the King and Kuhina Nui. L. KAMERAMERA.

The Legislative Chambers of the Kingdom will meet for the dispatch of public business at their respective Chambers at the Court House, in the City of Honolaia, on the date and time specified in His Majesty's Proclamation-promulgated this day-and they are to assemble in the Chamber of the House of Nobles at half-past ten A. M, on the First Day of May A. D. Eighteen hundred and sixty-two, to hear the Royal Address from the Throne. L. KAMEHAMEHA. Home Office, March 12, 1862.

Foreign Summary.

Hon. Garrett Davis has been elected U. S. Senator from Kentucky, to fill the vacancy occasioned by the expulsion of John C. Breckinridge. One of the swor is which was stolen from Japanese

been recovered, and will be returned to him by the first conveyance to Japan. The swords were stolen by a young man who is now in the rebel army. The President occupied a seat beside Vice President Hamlin during the delivery of the eulogics consequent on the death of Sepator Baker. Visits of the President to either House of Congress are of a rare occur

reace, and this is the first instance of the kind certainly within the past quarter of a century. The New York Times says the President has been assured that the Kentucky Legislature will soon emancipate all slaves in that State, reimbursing all

The Richmond Enquirer of a recent date has an editorial article advocating the raising of a great Southern army by conscription. The rebels appear to be short of men.

The moneyed men in New Orleans are placing all their funds in Europe. They pretend to fear that their money will fall into the hands of the Northerners-but the real fear, is being robbed by the confed-

A private letter from Port Royal states that one of the Quartermasters has on his own responsibility set about forty cotton gins at work. The negroes as an inducement to work, are to receive three cents per pound for all marketable cotton, and they have gone into the business with enthusiasm.

It is stated that some capitalists have in contemplation, the reopening of the steam ship route to California via Nicaragua. It is said that the parties who have taken hold of this enterprise, have abundant means to carry it out, and that steps have already been taken to examine and survey the route, preliminary to the commencement of active operations.

In the south of France, a harvest of two and a half millions of pounds weight of flower leaves is gathered every year, and sold for about £250,000 sterling. It consists of 100,000 pounds of leaves of the orange blossom; 500,000 pounds of rose leaves; 100,000 pounds of issuine blooms; 60,000 of violets; 60,000 of scacia buds; 30,000 of tube roses; and 5000 of jonquii flowers.

One of the most extraordinary salt wells on record, serhaps, is now in operation at Wellsville, Ohio. The well was sunk in anticipation of finding oil, but when at a depth of four hundred and eighty feet the borers struck a vein of gas, which burst with such violence as to eject all the tools used in boring. together with two hundred feet of pipe which had been previously introduced. The boring had developed a very strong vein of salt water, which yields a barrel of salt an hour.

THE COTTON SPECULATION -We remarked, a few weeks since, that a gentleman of this city says the Boston Bulletin, predicted that cotton would go to S0c; it is held at that price to-day. Last week one of our leading manufacturers bought 900 bales at 274c; six weeks ago the same person sold Cotton, of the same quality, at 21c. It only requires pluck to carry this speculation, both of the raw and manufactured article, to a very high figure.

VANCOUVER'S ISLAND -A steamer will leave this country in November for Vancouver's Island, via Cape Horn, which is to be employed in carrying the mails between Victoria and San Francisco, so as to connect with the Isthmus route. The colonists of British Columbia and Vancouver have for many menths past been greatly inconvenienced by having no vessel to take on their mails; and as the Home Government has not helped them, the colonists have had to take the matter into their own hands - London

The export of produce from New York for the week ending December 28th, amounted to \$4,295,000 greater than for any previous week in the entire history of that port. The exports from the first of January up to that date amounted to \$135,944,177, against \$100,005,966 for the previous year, and \$66,790,612 for 1859. This is what we should call making pretty rapid progress.

The President of the United States took a step that disturbed the aristocracy of the National Capital, and perhaps it may disturb the courts of other nations. He went out to dine. That was a fearful event in the etiquette of social life at Washington, as there it is considered that the President, like a king, must only receive honor from his subjects, not on his part honor them. The dinner the President attended was given by the Secretary of War to the governor of Pennsylvania, to which the President, members of the Cabinet, and leading members of Congress were

The Walton Matthew murder trial in New York resulted in the conviction of the accused-Charles M. Jefferus. The case in one of the most remarkable in the history of criminal jurisprudence. The prisoner is young, good looking, attractive in manners; and yet the evidence shows that he has been playing the part of a professional assassin. And the person by whom he was employed was his own mother! This woman, who testified that she passed for the wife of three different men at the same time-gave her son \$2,000 to commit the deed.

Cotton is making agitation every where besides in the south. Companies have been organized to introluce or extend the culture of it in Jamaica, in Venezuela, in Central America, and in Africa. They have also been formed in Belgium for the same purpose. In the mean time progress is making to pro-mote the culture of cotton in the East Indies to the greatest extent, and so far that it will not be singular if the British and French manufacturers drew all their supplies from that country, except what is drawn from the West Indies. For our part we could never see any reason why the islands of the latter growing regions of the world .- Pough. Eagle.

ANOTHER SOURCE OF COTTON SUPPLY .- The London correspondent of the N. Y. Commercial writes : "The belief, that at the present high prices, supplies of cotton will be drawn forth from a number of unexpected sources, whose contributions, individually small, will make up a not inconsiderable aggregate, continues to be entertained, and fresh illustrations of its correctness are daily furnished. This morning, for instance, it is announced from Ru sia that unprecedentedly large quantities have been sent into that country from Bokhara and Khiva, and that further consignments will follow. The manufacturers approve of its quality, and say that it makes a

A GIGANTIC SCHEME .- We understand that parties are now in Washington, representing large European and American interests, urging upon government the necessity of constructing a ship canal between Lake Eric and Lake Michigan. They look to the State of New York to widen and deepen its great canal, and to the State of Illinois to enlarge its canal, so that vessels may be ladened, according to their theory, nine months of the year on the Mississippi and dis-charged on the Hudson. It is asserted that by the time the canal could be completed, should the government enter at once upon the project, the productions of the West would swell vastly beyond their present dimensions, and give to the country great additional resources for an exchange of products for the staples and manufactures of Europe. The canal between the two points would be about 160 miles long; the Illinois Canal is 100 miles; the connection with the Mississippi River would be at Peru, the terminus of the Illinois Canal, by the way of the Illinois River, which is very deep and broad nearly its whole length.

CANARIES!

THE UNDERSIGNED HAS for sale a few very excellent CANARIES, just arrived from Hamburg, per "R. W. Wood."

They are the best songsters ever brought to Honolulu, and will be sold at very reasonable prices. Persons wishing to obtain one or more of these birds will please make early application, as there are but a few left. Apply to At the store of Messrs H. Hackfeld & Co.,

European Summary.

Queen Victoria now reigns over 174,000,000 of people. Of this number British India has 135,000,-

It appears from the returns made by the officers appointed to take the late census, that the population of Paris amounts to 1,700,000 souls. Seventeen private soldiers of the French army, in Bonaparte's time, by their bravery and talents, raised themselves to the following distinguished stations: Two became kings; two princes; nine dukes; two field

marshals, and two generals. The Gas Company of Plymouth, England, has reduced the price of gas to 75c per 1,000 feet, and yet it pays a dividend of 10 per cent, on one half its shares, and 74 per cent. on the other half, the highest dividends allowed to the company by law.

PRINCE NAPOLEON .- It is pleasant to observe the thorough courtesy shown by the Prince Napoleon to Americans abroad. It seems that the hospitality shown to himself and wife while here was fully appreciated and has rendered him a fast friend to the United States. He warmly espouses the Federal cause. He says Southern insurrection cannot, and ought not to prevail.

GREAT BRITAIN .- The London Times, in an editorial on the efforts of a class in Lancashire to induce the British Government to interfere in America, and break the blockade, says that England would rather undergo much suffering than break the plain rules of international law. She has recognized the blockade, and must abide by it. To break it would disgrace and stain the reputation of England. England will not commit such an act, even to save her great-

ITALY -From Italy we learn that active negotiations are going on with France, relative to guarantees for the spiritual independence of the Pope, if Rome should become the capital of Italy. A diplomatic rupture between Italy and Spain is anticipated, should the latter continue to refuse the delivery of the archives of the Neapolitan Consulate. Tommy, while the embassy were in Baltimere, has

Baron Ricasolis' dispatch to the Papal Government, ends with a significant threat that unless the Pontifical Government agrees to the liberal terms be offers, the Italian people may withdraw as a nation from the Communion of the Papal Church. A perilous threat to be laid to heart by taose who rule in Rome, especially when backed by the clear and admirably argued paper in which that conclusion is stated.

DEATH OF LACORDAIBE .- The death of Lacordaire, the celebrated French preacher, is announced. He was born in Burgundy, May 12, 1802 After leaving school he studied for the stage under the famous Talma. Next he studied law. Finally, he became an attached member of the church of Rome, and was ordained a priest in 1827. Since then he has been generally known as the most brilliant pulpit orator in France. He sat for a short time in the National Assembly. He always held liberal views, for a Catholic, as was seen in his ardent support of the Emperor's Italian policy. When he was admitted to the French Academy, about a year ago, he pronounced a warm eulogy on American institutions.

FEIGATE LA GLOIBE A FAILURE .- Private advices from Paris and Toulon assert that the armor plates of the iron-plated frigate La Gloire have become loosened upon her sides from the ship's working when at sea, and that she consequently leaks to such an extent when under steam that she is in reality unseaworthy. The quality of her armor plates is also suspected to be of a very inferior character to those manufactured in this country. This last sup-position, it is said, has arisen from the fact of two armor plates having been supplied to the Spanish Government by the firm which manufactured those for La Gloire as specimen plates for testing, and which were said to be even superior to those supplied to the French Government. The Spanish Government tested the plates after the fashion adopted in this country, at 200 yards with 8 inch guns, and the

result was that the plates broke in pieces each time they were struck by a shot .- The Times. THE UNEMPLOYED IN GLASGOW.-Trade in Glasgow is at present very dull, so that there are no fewer | Being the best that could be found in San Francisco, will than from 6,000 to 7,000 able-bodied men out of work there. The misery consequent thereupon is very great, because under the Scottish poor-law ablebodied poor have no claim upon the parochial authorities. Nor has the wretchedness of this numerous class at all reached its height, for hitherto the weather has been open, little frost, and no snow, so that when winter arrives it is feared that g eat want and extreme cold will make sad havor among the poorer populaare bestirring themselves to alleviate the distress existing, and it is bound in the bound of th isting, and it is hoped they will be able to drive the "wolf from the door" to some extent. In order to hasten the movement for relief, a large meeting of the unemployed took place on Saturday, in Glasgow. They sent a deputation to the Lord Provost, and the answer they got was to the effect that work or food would be provided for them by Monday, at 1 P. M. DISTRESS IN FRANCE,-The American civil war has affected France even more than Great Britain. Not only is cotton as necessary to her as to us, but the United States were her best and most liberal customers. The Parisian trade in articles de luxe is paralyzed, while the Lyons silk mills are closing, with glutted warehouses and no orders for the future The cities are exerting themselves to keep down the price of bread, but they can do no more, and everything besides bread is slowly rising in price. All this while the taxation of France is heavy, searching, and peculiarly inflexible. Englishmen, penetrated with the notion that they are, of all men, those most heavily afflicted with the tax gatherer, are apt to forget that France raises a still larger revenue out of property two-thirds less, and does not find it sufficient by an average of twelve millions a year. All the symptoms observable or conjecturable indicate a winter of extreme severity, both in the natural and political world, and France is in no temper for endurance.-Spectator.

Special Botices.

Dr. HOSTETTER'S STOMACH BITTERS. ventive and cure for Fover and Ague, Flatulence, Heaviness of the Stomach, or any other like affection. Their effect upon the system is most miraculous; they give a healthy tone to the system, relieve all morbid matters, and in fact thoroughly cleanse the system of all impurities. In no case has it been known to fail, but on the centrary, new virtues have been found in its use. To those afflicted with any of the above ills of the body, the Bitters" are offered as a speedy and certain cure. Try them and form your own opinion.-Sold by all Druggists and dealers

A. F. & A. M.-LE PROGRES DE L'OCEANIE LOOGE No. 124, under the jurisdiction of the Supreme Council of the Grand Central Lodge of France, working in ent Scotch Rite, holds its regular meetings on the Wedneeday nearest the full moon of each month, at the old Lodge Room, in King street. Visiting brethren respectfully invited August 18. [293-3m] P. C. JONES, Secretary.

ITALY AS A FIRST-CLASS POWER.-Late debates in the Italian Legislature show that Italy at this moment describes to take her place among the great power of Europe, According to her Minister of War, Della Rovera, she has 260,000 men under arms, of whom 200,000 are efficient soldiers. Of the old Bourbon and Ducal armies, 42,000 are now in the ranks. The conscription of next Spring will raise the present army to 200,000, while 50,000 volunteers would take the field, whenever summoned to it by

The Minister of Marine, Menabrea, stated that in his department were 83 men-of-war, carrying 989 guns, and having 13,480 horse power. Italy has besides, eight frigates in the docks, four of which will be launched within a few months. Compared with Austria, she has three more ships, 286 more guns and twice the horse power. The Spanish navy is considerably larger in vessels, but slightly inferior in

the number of guns and the amount of power. The Italian government is doing its best to promote the construction of public works. A railroad has recently been opened all the way from Bologna to Ancona on the Adriatic, running along the base of the Appenines and at no great distance from the old Roman road built by Æmilius, more than two thousand years ago-a work that is still in a state of remarkable preservation. Within twelve months it is estimated that a journey between Turin and Naples can be accomplished within forty hours-twenty-four rail and sixteen by coach. On the various lines of the former 35,000 workmen are busily employed. To carry on those undertakings as well as ruise a sufficient national armament, the government is compelled to borrow largely; but as the money goes back among the Italian people and sets numerous other forms of industry in operation, the national debt can not be felt as a grievous burthen. The policy which the great Cavour initiated in the valleys of Piedmont is being followed by his successor to the extremities of Calabria with the happiest effects upon national unity and the welfare of the Italian people. Meantime, a cordon of enterprising communities is being daawn around Rome and Venitia, which must ultimately cause them to drop into the Kingdom of Victor Emanuel
